

## PUNCHLunch –

the online lunch seminar of the PUNCH4NFDI Consortium

Every second Thursday, 12:30-13:30 hrs: keynote and discussion

---

Thursday, 16 December 2021, 12:30 hrs:

**Oonagh Mannix (HZB)**

### **The Helmholtz Metadata Collaboration Hub Matter**

**Prototyping metadata for cultural change**

#### **Abstract:**

The Helmholtz Metadata Collaboration (HMC) is a research infrastructure platform that works together with other consortia, including the NFDI, to make data across the Helmholtz Association FAIR: findable, accessible, interoperable and reusable.

HMC Hub Matter is responsible for effecting this change in the fields of particle, astroparticle and plasma physics, along with

the field of accelerator technologies (and research in other large scale facilities such as photon and neutron sources). To achieve this we concentrate on building technical infrastructure, implementing policy and processes, and changing cultural practices. We will illustrate how this works in practice using an initial use case at the EMIL (energy materials in-situ laboratory) at the Helmholtz Centre Berlin. The discussion will touch on why metadata is important, the meaning of FAIR, and the current state of metadata in the Helmholtz Association.
